

HA-tag Mouse Monoclonal Antibody (1B10)gated

Catalog No: #ABT525

Orders: order@abscitech.comSupport: tech@abscitech.com

Description

Product Name	HA-tag Mouse Monoclonal Antibody (1B10)gated
Host Species	Mouse
Clonality	Monoclonal
Purification	Affinity purification using immunogen.
Applications	WB
Species Reactivity	N/A
Specificity	The HA-tag antibody can recognize C-terminal, internal, and N-terminal HA-tag fusion proteins.
Target Name	HA-tag
Concentration	1.0mg/ml
Formulation	Mouse IgG1 in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Storage	Store at -20°C

Application Details

Western blotting: 1:1000~1:3000

Images

Western blot analysis of HA Recombinant protein, using #ABT525 diluted at 1:2,000.

Background

Human influenza hemagglutinin (HA) is a surface glycoprotein required for the infectivity of the human virus. The HA tag is derived from the HA-molecule corresponding to amino acids 98-106 has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. HA tag antibody is a highly sensitive and affinity monoclonal antibody applicable to HA-tagged fusion protein detection.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
